SOFTWARE ENGINEER

Full stack web developer with hands-on experience in Ruby on Rails, JavaScript programming and React.js as well as a background in computer science. Possess strong skills in design, execution, communication and teamwork that helps any team to achieve aesthetic responsive applications. A life of asking questions and knocking on doors has led me to many interesting places, such as a medieval fair where I camped for a whole season.

TECHNICAL SKILLS

React, Ruby, Rails, Javscript, HTML, CSS

TECHNICAL PROJECTS

BookCook- GitHub | Demo
An app that lets the user write their recipes.
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Cors and the JWT gems were implemented for the Rails backend.
- Built a log-in system with validation on the Rails backend to confirm a user's identity.

Alive Journal - GitHub | Demo
A private journal for the user's notes, tasks and thoughts.
- Used JSON Web Tokens and localStorage to store encrypted user information client-side.
- Deployed a Rails back end API with the MVC pattern.
- Installed the Cors and the JWT gems for the Rails backend.
- Built a log-in system with validation on the Rails backend to confirm a user's identity.

PokeDexter- GitHub | Demo
A searcher for Pokemon stats from the Pokemon API.
- App constantly makes fetch requests to an external API.
- Deployed through GitHub Pages.
- Created with only JavaScript, HTML and CSS.
